

Surgery Consent Form

Client Name: _____ Pet Name: _____

Procedure: _____ Date: _____

Your pet is scheduled for surgery. He/she should not have eaten after midnight the night before (except toy breeds). Surgical patients receive a full exam at no charge the morning of the surgery and if there is anything that may interfere with surgical safety, we will not perform the procedure.

Bloodwork

We recommend pre-surgical blood tests for all our patients. This testing ensures that your pet can properly process and eliminate an anesthetic. While optional for young healthy pets, senior pets (6+ years) must be tested due to their higher anesthetic risk. These tests can be performed 2 days to 3 months prior to surgery.

- Already performed
- Declined

At-home pain medications

While we give injectable pain relief medications pre- and post-operatively, we recommend pain medications for most surgical procedures and require them for all declaws and invasive surgeries.

- Declined (must get vet approval)
- Accept \$15-\$40

E-Collar

We recommend an Elizabethan collar for most surgeries. If the veterinarian feels an e-collar is necessary and you decline it, you are responsible financially for the surgical and medical repair in full.

- Declined
- Accept ~\$15

Microchip

The Microfindr Microchip can be implanted during surgery while your pet is anesthetized. Microchipping greatly increases the chance of finding your pet should he/she ever become lost.

- Declined
- Accept \$55

I am the owner (or authorized agent) of the above mentioned animal, authorize and request a surgical procedure for my pet. I understand and accept that there are always inherent risks, including death, with any anesthetic procedure. I authorize the clinic staff in an emergency situation to follow through with such procedures as are necessary for the well-being of my pet on a continuing basis until further communication with me is possible. I understand that there is additional charge for obesity, in-heat animals, lactating animals, pregnant animals, and some dental extractions. I understand that a member of the Parker's Paws staff will contact me when these charges incur but will not stop the procedure if direct communication is not achieved. I understand payment is due when my pet is discharged. I accept financial responsibility for charges incurred for this pet.

I understand that Parker's Paws is a flea free facility and that I will be charged for flea medication and a dose will be applied if evidence of fleas is found on my pet.

PHONE NUMBER: _____

Fluid Therapy

We recommend IV catheterization and fluid therapy for all our patients. While optimal for young, healthy pets, senior pets (6+ years) must have an IV catheter in place during any procedure for blood pressure support and easy access to a vein. **This is part of your cost for surgery and is already included. Your pet's leg may be shaved for the process.**

Vaccines

All patients must be up to date on vaccinations appropriate for their age.

- Proof of vaccines given
- Rabies and License \$28
- FVRCP or DA2PP +/- Lepto \$24-\$32
- Bordetella (dog only) \$24
- Feline Leukemia (cats only) \$27

Heartworm or Feline Leukemia/FIV Testing

Heartworms, feline leukemia, and FIV can increase risk in anesthesia. We recommend our patients be tested for these:

- Declined or already performed
- Heartworm test (dogs only) \$35
- FeLV/FIV test (cats only) \$53

Other services (while they are sleeping!)

- Nail Trim \$10
- Ears cleaned \$10
- Anal glands expressed \$10
- Other requests:
